CERAMIC COATING PRICING & SERVICE GUIDE

Professional Paint Protection • Glass & Wheel Coatings • Paint Polish & Correction

QUALITY-FIRST COATING

Ceramic coating formula products are included in the final quoted price. We encourage customers to choose premium, professional-grade formulas like Nano Diamond Quartz or CARPRO for superior gloss, hydrophobic self-cleaning properties, stronger long-term durability, and maximum UV/salt protection in island environments.

All prices are starting prices and are subject to vehicle inspection, paint condition, paint polishing requirements, coating grade selection, and surface preparation needs. Final price quotes will be emailed or texted directly to the customer following vehicle review.

1. COMPONENT & ACCENT COATINGS

Service	Starting Price
Windshield Glass Coating	\$150
Full Glass Package (All Windows + Mirrors)	\$350
Wheel Faces (Set of 4)	\$250
Wheels Off (Full Barrels & Faces - Set of 4)	\$500
Brake Calipers (Set of 4)	\$200
Trim & Plastic Restoration Coating	\$200
Leather & Interior Vinyl Shield	\$350
Fabric & Carpet Hydrophobic Protection	\$250
Convertible Soft-Top Coating	\$300

BUILD YOUR COATING PACKAGE

Package Includes	Starting Price
Glass & Trim Package: Windshield Coating + Trim Restoration	\$300
Wheel & Caliper Package: Wheel Faces + Calipers	\$400
Interior Defense Package: Leather/Vinyl Shield + Fabric Protection	\$550
Full Exterior Accents: All Glass + Wheel Faces + Plastic Trim	\$700
Total Armor Package: Full Interior Defense + Wheel Faces + Windshield	\$1,100

CUSTOM COMBINATIONS

Not seeing the exact combination you want? Tell us which surfaces you want protected and we'll build a package around your vehicle. We can also formulate specialized multi-layer ceramic packages for marine, off-road, or commercial applications.

2. FULL EXTERIOR CERAMIC COATINGS

Full vehicle ceramic coatings are quoted by vehicle size, coating durability tier, and required paint polishing. Paint correction (polishing) is evaluated during inspection and quoted based on paint defects.

Vehicle Type	Entry Tier	Premium Tier
2-Door Coupe	\$800	\$1,200
Small Sedan	\$850	\$1,300
Large Sedan	\$900	\$1,400
Small SUV / Crossover	\$950	\$1,450

Vehicle Type	Entry Tier	Premium Tier
Mid-Size SUV	\$1,050	\$1,600
Large SUV	\$1,200	\$1,800
Small Pickup	\$1,000	\$1,500
Mid-Size Pickup	\$1,100	\$1,650
Full-Size Pickup	\$1,250	\$1,850
Large Truck / SUV	\$1,400+	\$2,000+
Van / Commercial	\$1,500+	\$2,800+

TRUCK & SUV CONSIDERATIONS

- Pickup beds, running boards, high roofs, roof racks, and large textured trim panels increase prep and application time.
- Large SUVs and vans require significantly more chemical product and labor than sedans.
- Aftermarket off-road accessories, lifted suspensions, racks, and oversized bumpers require additional prep time.
- Extensive paint polishing/correction is quoted separately after inspection.

SPECIALTY & PAINT POLISHING SERVICES

Service	Starting / Additional Price
Single-Stage Paint Enhancement (Light Polish)	Included in Base Price
Stage 1 Paint Polishing (50-70% Defect Removal)	+\$300–\$500
Stage 2 Paint Polishing (80-90% Defect Removal)	+\$600–\$900
High-Spot Removal / Previous Coating Stripping	+\$150–\$400
Engine Bay Detail & Ceramic Shield	+\$150–\$250

3. CERAMIC COATING OPTIONS

OUR PREFERRED BRAND: CARPRO While we offer multiple top-tier formulations, CARPRO is our strongly preferred chemical manufacturer for tropical environments. Their line—led by Nano Diamond Quartz—delivers unmatched structural hardness, self-cleaning slickness, and thermal stability against harsh island UV and salt exposure.

Brand / Product Family	Rating	Best Qualities & Features
CARPRO Nano Diamond Quartz (DQUARTZ Pro/Go) (Featured / Strongly Preferred)	★★★★★ (5.0/5)	Maximum Scratch Resistance & Hardness; deep gloss; strong salt and fallout resistance.
CARPRO CQUARTZ DQUARTZ	★★★★★ (4.9/5)	Diamond-hardness base coat designed to reduce micro-marring and wash-induced swirl marks.
CARPRO CQUARTZ SiC	★★★★★ (4.9/5)	Exceptional chemical and water-spot resistance, slick feel, deep wet look.
CARPRO CQUARTZ UK 3.0	★★★★★ (4.9/5)	All-weather chemical protection with intense hydrophobicity.
CARPRO CQUARTZ Lite 2.0	★★★★■ (4.8/5)	Quick-turn, user-friendly entry coating with high-gloss enhancement.
Gyeon® Q ² Mohs EVO	★★★★★ (4.9/5)	Fluorine-modified technology, gloss, self-cleaning and durability.
Gyeon® Q ² Pure EVO	★★★★■ (4.8/5)	Deep, glass-like candy finish.
IGL Ecocoat Quartz+	★★★★■ (4.7/5)	Low-VOC, high-solids ceramic system.
Gyeon® Q ² One EVO	★★★★■ (4.6/5)	User-friendly entry-level protection with strong gloss and clarity.
Kamikaze ISM 2.0	★★★★★ (4.9/5)	Boutique warm, oily, wax-like sheen with water-spot resistance.

4. WHAT'S INCLUDED — PRE-COATING PREPARATION

Proper surface decontamination and paint polishing are critical for chemical bonding, longevity, and finish clarity. Every installation receives complete paint decontamination prior to application.

- 1. Vehicle inspection: Check paint depth, clear coat health, deep scratches, rock chips, repainted panels, oxidation, and installation risks.
- 2. Initial rinse: Flush sand, salt, and loose debris before touch washing.
- 3. Foam / pre-soak: High-pH foam strip wash to break down old waxes, sealants, and street grime.
- 4. Hand wash: Two-bucket method hand wash using surface-safe residue-free shampoo.
- 5. Wheels & tires: Thoroughly clean wheels, wheel wells, and tires.
- 6. Chemical decontamination: Dissolve embedded road tar and industrial fallout.
- 7. Iron / fallout removal: Dedicated iron remover for ferrous contaminants.
- 8. Tar / adhesive treatment: Spot-treat stubborn tar and sap deposits.
- 9. Clay decontamination: Clay bar/mitt treatment for smooth paint prior to polishing.
- 10. Final rinse: Complete rinse of chemical decontamination agents.
- 11. Drying & blow-out: Microfiber and compressed air dry crevices, badging, and trim.
- 12. Surface prep wipe: Alcohol-based panel wipe removes polishing oils for bonding.

ADDITIONAL PREP

Severe water spot etching, heavy overspray, failing clear coat, or oxidation requiring extensive paint polishing will be quoted separately prior to coating.

5. OLD COATING STRIPPING & VEHICLE CONDITION

Before applying a new ceramic coating, we ensure your vehicle's surface is completely free of old chemical layers, mineral deposits, or surface issues. Ceramic coatings lock in whatever is beneath them, so any existing layer or defect must be addressed first.

Service	Price	Description
Failed/Old Coating Chemical Stripping	\$60/hr	Chemical removal of old waxes, sealants, or degraded coatings.
Heavy Water Spot & Acid Rain Removal	\$60/hr	Mineral dissolvers and targeted polishing for baked-in water spots.
High-Spot Leveling	+\$100–\$300	Polishing visible streaks or cloudy patches from previous installs.
Minimum Prep Charge	\$200	Baseline inspection, panel prep, and decontamination labor.

IMPORTANT COATING DISCLAIMERS

- Coating is not paint repair or armor plate: it protects clear coats but does not fill deep gouges, cover missing clear coat, or prevent major rock chips.
- Repainted panels must be fully cured (30–90 days) prior to application.
- Deep scratches and etched water spots will be locked under the coating if not polished out first.
- Curing times vary with tropical heat and humidity; improper maintenance can cause high-spot hazing.
- Approval of quote acknowledges these disclosures and authorizes professional paint polishing and application.

VEHICLE ACCEPTANCE

- Final pricing is confirmed after an in-person inspection under detailing inspection lights.
- Vehicles with failing, peeling, or thin clear coat may be declined or restricted to non-abrasive services.
- Please remove personal items and disclose known repainted panels.

6. AFTERCARE & PERFORMANCE EXPECTATIONS

- Proper maintenance preserves hydrophobic performance and gloss levels.
- **Curing phase (First 7–14 Days):** Avoid washing with detergents or exposing to harsh chemicals while cross-linking completes.
 - **Washing:** Hand-wash with pH-neutral shampoos without added waxes or gloss enhancers; avoid automated brush car washes.
 - **Drying:** Use clean plush microfiber towels or forced air.
 - **Contaminants:** Remove bird droppings, tree sap, and bug splatter promptly in island heat.
 - **Annual Maintenance:** Schedule annual inspection to remove bonded minerals and refresh hydrophobic performance.

PERFORMANCE EXPECTATIONS

Expected coating longevity depends on selected product grade, surface preparation, tropical weather exposure, and routine maintenance. Outdoor parking, high heat, salt exposure, and neglect naturally impact real-world lifespan.

7. CUSTOMER QUOTE WORKSHEET

Use this page during vehicle inspection to build a clear, itemized ceramic coating quote.

Customer / Vehicle Information	
Customer Name	_____
Customer Phone / Email	_____
Vehicle Year / Make / Model	_____
Paint Color / Type	_____
Coating Package Selected	_____
Coating Brand / Tier	_____
Paint Polishing Level Needed	Stage 1 / Stage 2 / Enhancement
Glass / Wheel / Interior Add-ons	YES / NO — _____
Old Coating/Water Spot Removal	YES / NO — \$60/hr starting
Estimated Completion Date	_____

PRICE SUMMARY

Item	Amount
Base Exterior Ceramic Package	\$ _____
Paint Polishing / Prep Labor	\$ _____
Glass / Wheels / Interior Protection	\$ _____
Additional Decontamination Labor	\$ _____
TOTAL QUOTED PRICE	\$ _____

CUSTOMER APPROVAL

I have reviewed the selected ceramic coating services, surface prep, disclaimers, and pricing. I authorize Splash & Dash Auto Detail Center to perform the work described in this quote.

Customer Signature: _____ Date: _____
Splash & Dash Representative: _____ Date: _____

PRICING BASIS

Labor target: \$20/hour. Baseline coating material assumption: ~\$150–\$300 per 50ml professional ceramic bottle. Material consumption, polishing pads, compounds, prep solvents, environmental controls, labor, and risk factor are built into pricing tiers. Heavy paint defect polishing and oversized/custom vehicles are quoted individually.
